

VETSENSE PERMETROL

Product Description

Action / Indications

Horses:

Control of pyrethroid sensitive flies—buffalo fly (*Haematobia irritans exigua*), stable fly (*Stomoxys calcitrans*) and biting insects (*Culicoides* sp.)

An aid in the treatment of Queensland Itch.

Dogs:

Control of fleas (*Ctenocephalides felis*, *Ct canis*) and ticks (adult *Rhipicephalus* sp.). An aid in the treatment of allergic dermatitis (summer eczema).

Directions for use

This product should not be used on cats and animals under 12 weeks of age. When diluted in methylated spirits, the product should not be used on broken skin.

Animal	Pest	Dilution	Critical Comments
Dogs	Fleas	10mL per 400mL of water or methylated spirits (if rapid drying is required)	Spray animal entirely ruffling the coat to ensure adequate penetration and coverage. Use weekly.
	Flea Allergy Dermatitis	10mL per 400mL of water	Spray or rinse as above daily until symptoms are controlled, then as required.
Horses	Ticks		In paralysis tick areas, daily searching for and removal of any ticks found is necessary.
	Stable FlyBuffalo FlySandflyQueensland Itch	10mL per 400mL of water	Spray as required for fly nuisance. For Queensland Itch [<i>Culicoides</i> bite hypersensitivity] spray twice weekly until symptoms abate, then as required

ZONE CONTROL:

To obtain maximum flea control, treat the animal's environment by cleaning the bedding and resting places and then regularly spraying the entire area with the diluted product. Treat all pets in the house with a suitable product.

Vacuum/clean the carpets and surroundings regularly. Continue treatment all year round. If flea problems persist, seek veterinary advice.

Active Constituents

40g/L Permethrin 25:75 (cis:trans)
