

# VETSENSE REHYDRATE FOR GREYHOUNDS

## Product Description

### Indications

Aids in maintaining and restoring normal electrolyte balance in body tissues due to strenuous exercise and sweat loss during training, racing, competition, traveling, and hot weather conditions

### Active Constituents

Each litre contains (as ions)

Chloride 43.3 g, Potassium 30.4 g, Sodium 27.6 g, Phosphate 17.4 g, Citrate 12.85 g, Sulphate 11.8 g, Magnesium 3.0 g, Glucose 260.0 g.

### Warnings

Always make available an adequate supply of clean fresh drinking water following consumption of Vetsense Rehydrate.

### Directions for Use

Dilute with clean, fresh water before each dose. Mix fresh solution daily.

*Before racing:* Mix 5mL with 125mL (half cup) clean water.

*After racing:* Mix 10mL with 250mL (1cup) clean water.

*Hot weather, nursing females:* Mix at the rate of 40mL/L of water and give as an alternative drink in conjunction with clean water.

### Presentation

500mL and 1L chamber bottles and 5L jerry can.
