

Neutramax

Mild Diuretic & Urinary Buffer For Greyhounds

PERFORMANCE/ EXERCISE RECOVERY

BODY ACID NEUTRALISER & ALKALI RESERVE REPLACER FOR THE TREATMENT & PREVENTION OF ACIDOSIS IN GREYHOUNDS

ACTIVE INGREDIENTS per L:

Sodium Citrate Dihydrate 280g & Citric Acid 93.4g

Features

- Specifically formulated for racing greyhounds.
- Rapidly metabolised and absorbed.
- Neutralises excess lactic acid in the blood and muscles.
- Aids in the treatment and prevention of dehydration and acidosis.
- Balances blood pH for optimum performance.

Benefits

- Exerts a mild diuretic and neutralising effect on acidic substances which can accumulate in muscles and blood after strenuous exercise.
- Restores depleted reserves of the most common bodily alkali, sodium.
- Supplies adequate body alkalines to neutralise acid build-up.
- May be dosed immediately following hard work.
- Able to be used in conjunction with standard daily electrolyte supplementation of Ranvet's Salka-Lite.

DIRECTIONS FOR USE/CONTRAINDICATIONS:

Ensure greyhounds have access to cool, clean water at all times.

IMPORTANT NOTE: Greyhounds with cystitis may have alkaline urine, and a veterinary surgeon should be consulted for correct treatment.

DOSAGE RATES:

Based on a 30kg greyhound

DAILY DOSE: 3mL mixed into food or water when greyhound is in hard work.

AFTER RACE DOSE: Add 5mL of Neutramax to the first 1 or 2 meals after racing, handslips or trials or administer directly into mouth by dosing syringe.

Greyhounds suffering from dehydration also require a daily dose of supplementary electrolytes.

PACK SIZE(S):

1L, 5L & 20L
