

## Organic arsenic tonic to improve coat, body condition and appetite

### COMPOSITION

Sodium arsenilate 50 mg/mL

### ACTIONS

\* Jurocyl is a safe, pentavalent organic arsenic tonic of low toxicity providing rapid response.

\* Jurocyl promotes healthy skin and coat growth.

\* Jurocyl stimulates appetite in picky eaters.

\* Jurocyl is of value as a general tonic in anaemias, debility, stress, illness & recovery.

Jurocyl is a pentavalent organic arsenical compound with strong tonic properties. Jurocyl has a marked effect on the blood vessels of both skin and gastro-intestinal blood vessels.

Jurocyl is rapidly absorbed, with a prompt and visible effect. Arsenic in the organic form has long been known and respected for its tonic properties.<sup>1</sup> This pentavalent form is not harmful to animals at recommended doses, and is well tolerated with no local or general reaction.

Jurocyl is indicated to stimulate appetite in poor eaters, particularly those horses suffering stress related to hard training and competition.<sup>2,3</sup> As a general tonic, Jurocyl is valuable in the treatment of anaemias, weakness and debility, emaciation, and skin conditions.<sup>2,3</sup> Jurocyl is particularly effective at promoting healthy coat growth, and encouraging seasonal changes in body coat because it improves blood flow to skin. A course of Jurocyl in August / September will produce dramatic improvements in dull, lifeless coats as the season changes.

### INDICATIONS

An injectable source of arsenic for horses.

### DOSAGE AND ADMINISTRATION

Give Jurocyl by sterile intramuscular injection.

*Adult Horses:*

10 mL weekly.

Intensive Course: 10 mL daily for maximum 10 days.

*Yearlings:*

5 mL weekly.

Intensive Course: 5 mL daily for maximum 10 days.

*Foals:*

2.5 mL weekly.

Intensive Course: 2.5 mL daily for maximum 10 days.

### WARNINGS

Meat Withholding Period (Horses): 28 days.

CAUTION: Arsenic preparations should not be used continuously. A period of one month should pass before any intensive treatment course is repeated.

If used in performance animals, the regulations of the relevant authorities regarding medication should be observed.

### PRESENTATION

100 mL sterile glass multi-dose vial.

### STORAGE

Store below 25°C (Air Conditioning). Protect from light.

### AVAILABILITY

For General Sale (APVMA 51242)

### NOTES

If used in performance animals, the regulations of the relevant authorities regarding medication should be observed.
