GLOW 'N' GO

Omega 3, 6 & 9. Oil Feed Supplement

Omega 3, Omega 6, and Omega 9 oils supplemented to the feed provides an additional supply of energy.

Energy oils are a cooler type of energy than those provided by grain.

Available Sizes
1L - 5L - 10L - 20L

Oils.

The source of fats chosen as energy for performance animals is a critical factor if you wish to gain an edge over your competitor. Dietary fat is essential to increase the energy levels of performance athletes, also lowering waste in the bowel.

Dietary fat assists in reducing health risks resulting from unbalanced intakes of sugar / starch.

Dietary fat is a good source of essential fatty acids, and helps in the absorption of fat soluble vitamins.

Energy Production. Use of oils for energy preserves blood glucose levels, delaying the onset of muscle cramp and fatigue.

Building cell membranes. This takes place throughout the body and includes skin, coat and blood cells. Oils have an essential role assisting blood flow and oxygen delivery. also assisting the flexibility of membranes and cell walls.

Formation of hormones. Regulation of inflammatory response and assists the reproductive and immune systems.

Dietary fat is an essential supply of fuel for performance greyhounds, reducing heat production.

Dosages: Administer in the feed

Greyhounds 20mL Morning 20mL Night

Showdogs 5 to 10mL Morning 5 to 10mL Night

Working Dogs 15mL Morning 15mL Night
