

**TuffRock Poultrice™** is a topical preparation and brace. It is the first 100% all natural product in the world manufactured from molecular reinforced hydrated alumino-silicates.

**TuffRock Poultrice™** is generally regarded as safe (GRAS)

Helps recovery from impact injuries, swelling, cuts & abrasions. Soothes and cools extremely quickly by instantly removing heat from damaged areas using the same principals as a plate heat exchanger to reach under the skin and provide relief to areas that need it most.

Can be used without bandaging, or otherwise apply liberally, cover with damp paper, plastic and lightly wrap. Pressure bandaging is not required.

Simply apply 5mm layer onto area required. No need to bandage.

Can be used to indicate rate of injury recovery or identify problem areas simply by observing wet and dry patterns over 45 minute period. Poultrice remains active (damp) longer on injured areas, non-injured areas dry normally.
