

# Diria tablets

**COMPOSITION:** Crospovidone

**ACTIONS:** Crospovidone has amphoteric properties and so stabilises the pH of the gut. It protects the intestinal mucosa by adsorbing toxins, and maintains and helps restore the balance of the intestinal flora.

**INDICATIONS:**

Aid in the management of diarrhoea and tympany caused by disorders of osmosis, secretion, permeability or motility brought about by infectious agents, food poisoning, dietary changes, and bacterial overgrowth in dogs and cats.

Complement to oral antibiotic therapy.

Prophylactic against gastrointestinal disturbances following gastrointestinal surgery.

Premedication to reduce intestinal gases before radiology.

**DOSAGE AND ADMINISTRATION:** **Dogs, cats.** 1 tablet/10kg bodyweight twice daily for three to four days.

**PRESENTATION:** Tablets (white, cross scored): 10's, 50's

**STORAGE:** Store below 30°C (Room temperature).

**POISONS SCHEDULE:** Nil

**APVMA NUMBER:** 48443
