

Rapid-Acid Neutralizer

For Horses and Greyhounds

Rapid Acid Neutralizer is used as an aid in the treatment and prevention of acidosis dehydration and tying up syndromes in horses and greyhounds.

Rapid-Acid Neutralizer is a mild diuretic and body acid neutralizer and has a neutralizing effect on acid substances which build in the blood stream after long and heavy training or exercise.

Rapid-Acid Neutralizer is a pleasant tasting caramel syrup containing alkaline buffer salts that neutralize the acid build-up and reduce sodium losses.

Rapid-Acid Neutralizer aids both horses and greyhounds in training that suffer fluid losses through heavy sweating and treats symptoms of 'tying up' (Lactic acid build up) that occurs to horses and greyhounds on high grain diets or high protein diets with unfit muscles and sudden workload demands.

A daily supplement of Rapid-Acid Neutralizer will ensure the acid/alkali level is balanced and enables optimum performance.

CONSTITUENTS: Each Litre of Rapid Acid Neutralizer contains:			
Sodium Citrate	280,000mg	Citric Acid	40,000mg
Potassium Citrate	80,000mg		

DIRECTIONS FOR USE, DAILY DOSAGE AND ADMINISTRATION:

Ensure a plentiful supply of clean drinking water is available to animals treated with Rapid-Acid Neutralizer.

Rapid-Acid Neutralizer may be used in the feed or water.

RACE HORSES		HIGH PERFORMANCE HORSES	
Gallopers	25mL	Show Jumping Horses	20mL
Trotters	25mL	Polo Horses	25mL
Quarter Horses	20mL	Eventers and Hunters	20mL

GREYHOUNDS	
Greyhounds in heavy training	5ml

Available sizes 1L, 5L and 20L
